SUMMARY

Full Stack Developer with 6+ years of experience designing, building, and scaling production web applications end-to-end. Proven track record of leading feature development, improving system performance, and mentoring junior engineers. Strong expertise in React/TypeScript on the frontend and Node.js/Python on the backend, with hands-on experience architecting cloud-native systems on AWS.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, Next.js, Redux, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express, Python (Django, FastAPI), GraphQL, REST API design
- **Databases:** PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, CloudFront), Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins)
- **Testing:** Jest, React Testing Library, Cypress, PyTest
- **Practices:** Agile/Scrum, TDD, microservices architecture, code review, system design

EXPERIENCE

Senior Full Stack Developer – Nexora Technologies

Aug 2022 – Present

- Led the redesign of the core dashboard using React and TypeScript, reducing page load time by 42% and improving user retention by 15%
- Architected a microservices backend with Node.js and Docker, migrating from a monolithic system and reducing deployment time from 45 minutes to 6 minutes
- Designed and implemented a CI/CD pipeline using GitHub Actions, cutting release cycles from bi-weekly to daily
- Mentored 3 junior developers through code reviews and pair programming, improving team code quality scores by 30%
- Collaborated directly with product and design teams to scope and deliver 12+ major features on schedule

Full Stack Developer – Vantage Digital Solutions

Jun 2019 – Jul 2022

- Built and maintained a SaaS platform serving 50,000+ monthly active users using React, Node.js, and PostgreSQL
- Optimized database queries and added Redis caching, reducing average API response time from 800ms to 180ms
- Developed RESTful and GraphQL APIs consumed by both web and mobile clients
- Implemented automated testing (Jest, Cypress) that increased code coverage from 40% to 85%
- Participated in on-call rotation and resolved production incidents with an average MTTR under 30 minutes

Software Developer – Coastline Apps

Jul 2018 – May 2019

- Developed features for a customer-facing booking application using Express and MongoDB
- Contributed to migrating legacy jQuery frontend to React, improving maintainability

FEATURED PROJECTS

DevMetrics – Open-source engineering analytics dashboard (React, Node.js, PostgreSQL, Docker)

- 800+ GitHub stars; used by several small engineering teams to track sprint velocity
- Deployed with Docker and hosted on AWS with auto-scaling

TaskFlow API – GraphQL-based project management backend (Node.js, GraphQL, PostgreSQL)

- Designed schema and resolvers supporting real-time updates via WebSockets

EDUCATION

B.S. in Computer Science – University of Texas at Austin (2018)

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2023)
- Certified Kubernetes Application Developer (CKAD) (2022)
